sumers.

New Session Opening To-motrow Will Have a Long, Gruelling Programme.

WASHINGTON, Nov. 29 .- Democratic leaders predict that the regular session of the Sixty-third Congress, which will be called to order at noon on Monday, will be deluged with business from the ment it meets until adjournment some time next summer or fall.

It is the general expectation that President Wilson will recommend the enactment of supplemental anti-trust legislation and that this question will have prominence as soon as the pending bana ing and currency bill has been spread on

the statutes.

When the Democrats took hold of the Government last March they were pledge! to revise the tariff, to pass a banking and currency reform bill and to strengthen the existing anti-trust laws. A new tariff law is already in operaand the enactment of the banking bill will be completed in the compara-tively near future.

In the session that will begin next week bills will be proposed supplement-ing the anti-trust laws in accordance with ommendations that in due season will communicated to Congress by Presi-

dent Wilson.

The anti-trust programme has not yet, been formulated by the Administration. It is known that the Democratic party is committed to maintain the integrity of the Sherman anti-trust law and that all bills relating to corporations which may he proposed by the Administration will be designed merely to supplement that

law. lines and to lay down regulations giving the Government supervision suance of securities of interstate corpora
